Driving Math and Reading Gains with AI

Find and Implement AI Tools to Drive Growth

Who is Digital Promise?

Digital Promise is a global non-profit with deep expertise in AI for learning and AI Literacy. Digital Promise works at the intersection of researchers, developers and educators to support the adoption of research-backed, evidence-based AI tools that can support your district's math and reading outcomes. We'll help you to evaluate your desired outcomes, pick a tool that shows promise for supporting them, and measure your return on investment.

How will we support you?

- Identify key metrics you're hoping AI tools can move the needle on in your district.
- Evaluate and procure an evidence-based AI tool to support your goal (HQIM integration, high-dosage tutoring, measurably improving math TEKS scores for 3rd graders, etc.)
- Create a strong implementation plan that will help you use the tool at a recommended dosage to produce results
- Learn about AI Literacy and weave AI Literacy practices into a strong AI tool implementation
- Share best practices with other districts and learn what's working across the state

---

Why Digital Promise?

Consultancy with researchers and experts

Researchers will support you to identify meaningful measures connected to learning outcomes. Experts will support tool evaluation and selection to achieve outcomes.

Evidence-based decision making

Implementation support and summary report to support you to make sure you are achieving your outcomes.

Thought partnership amongst leaders

Collaboration and thought partnership with other district leaders for consultancy and support navigating shared problems of practice.

Advance Powerful Learning

Digital Promise will feature your district as a leader advancing Powerful Learning with emerging technologies in the field

How It Works

October	November	Dec & Feb	Jan & Mar	April
⊙ Project Kickoff with full cohort.	⊙ AI tool evaluation & selection ⊙ Design implementation plan	⊙ Cohort meetings: collaborative consultancy and troubleshooting	⊙ Individual meetings: implementation and measurement support	⊙ Final cohort showcase. Review summary report, identify next steps.
