

In 20 words or less, what big idea(s) are you taking away from Jason's keynote?

How to perceive AI differently from the lens of a young learner.

Cultural shifts will strengthen the work we do with AI and we've got to bring the people along

AI is not neutral; it can increase or decrease inequities.

We have a moment to more clearly articulate what good education looks like, with or without technology.

The human aspect is SO important. Good teachings STILL good teaching, with or without AI!

Our role as educators to interrupt AI so all students have opportunities to benefit and gaps close versus widen.

AI is not going anywhere and we need to adapt to use it to our benefit.

AI is here and we need to embrace it and empower our students with the technology.

In 20 words or less, what big idea(s) are you taking away from Jason's keynote?

We have to transform pedagogy or else we won't see a change in outcomes.

Sound pedagogy, regardless of technology, sets the foundation for authentic learning.

Good teaching is still good teaching. AI is here and we need to get future leaders ready.

When we shift our mindsets from fear to possibility, we can create opportunities where our students and educators thrive.

The value of Change management. AI is here Leadership Characteristics IN THE AI Era

AI is not against us. Use to provide active learning setting.

We are the facilitators of technology building a thriving future for change.

Teachers are afraid of AI because they may not have the knowledge or skills to understand or harness what their students are capable of doing/producing.

In 20 words or less, what big idea(s) are you taking away from Jason's keynote?

Technology is not the solution, but another tech tool. We need to shift instruction and learning from not just content delivery. Students need to be curious and engaged.

Leadership really matters and a point of view on instruction and learning culture

AI is important to education

AI is here ready or not. We must adapt.

Educators are scared of using AI in the classrooms because we don't know how to use it ourselves.

Where learning culture rises to the top and curiosity is still applied

Understanding how AI thinks.

The future of education will include AI. As a leader it's essential guide teachers and students.

In 20 words or less, what big idea(s) are you taking away from Jason's keynote?

Good teaching practices supersedes all technology, embraces technology as a true tool to facilitate learning experiences for students.

We are changing mindset around AI use as we prepare our learners and educators for the future.

Good and bad with AI in education. Intentionality needed

How do I fuse what I know about PBL, Challenge-based learning, and other models- to leverage AI... 10x factor.

Importance of using AI in schools as a tool to ensure that great teaching is accessible to all our students in order to prepare them for our current/future landscape

Intentional leadership is the differentiator and importance of leveraging disruption and seek opportunity.

The fundamentals of great teaching still count. Create, criticize, evaluate, analyze, understand.

Intentional leadership is the differentiator and importance of leveraging disruption and seek opportunity.

In 20 words or less, what big idea(s) are you taking away from Jason's keynote?

Taking a deeper dive into
how AI tools can transform
learning and teaching.

In 20 words or less, what big idea(s) are you taking away from the Playlab and Policy sessions?

Playlab: personalization is important as it empowers folks to amplify their reach. Policy: there is a lot, but the focus remains student safety.

New use cases will emerge from motivated, informed, and well-resourced end users.

Customizable AI and policy requirements are here.

I want to be 3 years from now, today!

That we as districts are not alone in trying to understand how to positively add AI into education.

The risk profile for PIR is huge. There's some education that needs to happen and potential rethinking of how video AI tools are used to record meetings (this is Kerri)

In 20 words or less, what big idea(s) are you taking away from the Playlab and Policy sessions?

Policy is getting a bit complicated and school districts will need help to navigate them.

interactive

Great tools were shared today.

Learning quality and outcomes was lowest on the policy list yet this rose to the top among educational leaders.

We have to think critically and strategically to leverage and meet the moment of what is happening.

The need to bring all stakeholders to the table. Even those that are not in schools and the need for regional collaboration.

AI policy is new and rapidly changing. Leaders need to be aware

The endless possibilities on how AI can support and advance teacher thinking and teaching.

In 20 words or less, what big idea(s) are you taking away from the Playlab and Policy sessions?

Playlab will be a useful tool for all staff and students. In policy the big thing was all the paperwork needed

Importance of advocating for legislative priorities in the world of AI. Playlabs practical use leading & supporting.

There are AI tools already in motion to facilitate learning and generate ideas. We need to keep abreast of AI policy, especially the hot tea so that we can better able mitigate or solve for barriers

This activity can be eye opening for teachers in how AI can truly support instruction not hinder it.

AI vision , strategic design, and planning needs to be a priority for all districts in the RGV and we need to collaborate across districts to share practices

Playlab was a great example of how we can empower our teachers in creating useful and data driven lessons for students. The policy session was informative as we are in beginning stage.

The playlab is a game changer for coaching teachers and teaching students. The policy information was a good update.

Playlab: lesson planning
Policy: more info

In 20 words or less, what big idea(s) are you taking away from the Playlab and Policy sessions?

Glad to hear the AI police is being implemented. Glad to know Educate Texas is taking the lead on this very important topic.

Playlab different supports
